👤 Profile

Data Engineer with experience designing and implementing data pipelines, ETL/ELT workflows, and analytical data models using Python, SQL, and Apache Spark. Experienced in integrating heterogeneous data sources, optimizing data processing workflows, and delivering reliable datasets for analytics and machine learning. Familiar with Databricks and distributed data processing concepts, with hands-on experience across Azure/AWS, SQL Server, PostgreSQL, dbt, and Dagster.

📁 Professional Experience

- | | |
|--|---|
| May 2024 – present
Bolzano, Italy | Data Engineer, <i>Fruitservice GmbH</i> ✓ <ul style="list-style-type: none">Designed and maintained production data pipelines using Python and SQL for ingestion, transformation, validation, and integration of data from APIs, databases, files, and enterprise systems.Built automated ETL/ELT workflows processing structured and semi-structured data for downstream analytics and reporting.Optimized SQL queries and data models to improve processing performance and reliability.Developed reusable data-processing components and automated workflows across Azure and on-premises environments.Prepared curated datasets for analytics and machine-learning use cases, ensuring data quality and consistency. |
| Sep 2023 – Apr 2024
Bolzano, Italy | Analytics Engineer, <i>Datatellers</i> ✓ <ul style="list-style-type: none">Performed exploratory data analysis, data cleaning, and transformation to support business intelligence and reporting needs.Collaborated with stakeholders to define analytical goals and key questions, delivering insights and data models across commercial and financial domains.Contributed to the development and optimization of scalable data pipelines and semantic layers to enable efficient downstream analytics. |
| Apr 2020 – May 2022
Tirana, Albania | Co-founder/Software Engineer, <i>Varg.io</i> <ul style="list-style-type: none">Designed and developed smart contract applications that enabled the automation of complex business processes on an enterprise-grade private and permissioned blockchain.Member of the team that developed a track and trace software for the explosives industry in compliance with the European Union regulation.Introduced the blockchain hosting platform to prospective clients primarily within the explosives and mining sectors. The presentations highlighted the platform's key features, benefits, and unique selling points. |

🎓 Education

- | | |
|-----------------|---|
| Bolzano, Italy | MSc. Computational Data Science, <i>Free University of Bozen-Bolzano</i> ✓ |
| Tirana, Albania | BSc. Computer Engineering, <i>Epoka Univeristy</i> ✓ |

🧠 Skills

Data Engineering & Processing

Python | SQL | Apache Spark | Databricks | Delta Lake

Data Warehousing & Database Management

PostgreSQL | SQL Server | Redshift

Containerization & DevOps Practices

Docker | Kubernetes | GitHub Actions

Cloud Platforms & Data Services

Microsoft Azure | AWS

ETL/ELT & Workflow Orchestration

Dagster | dbt | Databricks Workflows

Streaming & Distributed Systems

Apache Kafka
